

Lighting for a brighter future

Light 
Technique

Bringing light
to every space.

Light Technique is a total light solution provider based in Dubai, United Arab Emirates.

Light Technique delivers bespoke and energy efficient architectural lighting solutions which are cost effective and time bound. We deliver turn-key projects, starting from lighting design, to light selection, providing you with the budget and bill of quantities, creating the CAD documentation for lighting and supplying the lights on site.

The founders of Light technique have a global network in the lighting field varying from suppliers, manufacturers and end users.

Passion and preparation are the key factors to the growth of Light technique. The goals and demands in the variety of projects are not only challenging but also rewarding when achieved.

We often create innovative and unique lighting solutions that are intended to enhance the aesthetic appeal of a space and improve the overall lighting experience. We use advanced technology and materials to create efficient and sustainable lighting solutions.

Illuminating your
space with style and
innovation

Mission

We strive to deliver exceptional customer service and cutting-edge lighting solutions to enhance the aesthetic and functionality of our clients' spaces. We are committed to using energy-efficient and environment friendly lighting solutions to support our clients' sustainability goals.

Vision

To be the premier lighting company in our region, providing innovative and high-quality lighting solutions to enhance the ambiance and functionality of any space.

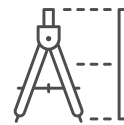

People make organizations successful. Light Technique is a team of motivated professionals who offer a multitude of services to get the best solutions for your projects.
